GROUP

FOR A TRADITIONAL  
STOVE WITH A  
SUBTLE MODERN  
TWIST, LOOK NO  
FURTHER THAN THE  
AVALON RANGE

With a simplistic, stylish design and an effortlessly elegant finish, an Avalon stove makes a timeless addition to any room. There are a variety of sizes and options available, which means you can find the perfect solution to heat your home, large or small. As well as boasting a chic design, all of the stoves in the Avalon range are DEFRA approved, allowing for installation in Smoke Control Areas.

## AVALON 4

Small but mighty, this reliable stove will serve your family for decades, and its elegant appearance will never age.

The Avalon 4 emits an impressive heat output of up to 6kW. As with all stoves in the Avalon range, you can choose either a black or stainless-steel handle - whichever suits your décor best.

- DEFRA APPROVED
- NO AIR BRICK REQUIRED
- 5" FLUE COLLAR
- TRIPLEBURN® TECHNOLOGY
- HOT AIRWASH SYSTEM
- WOOD OPTION AVAILABLE
- HANDLE OPTION AVAILABLE
- CAN BE FITTED ON A 12MM HEARTH WHEN FREESTANDING

ENERGY EFFICIENCY CLASS **A**

HEAT OUTPUT 3.5kW TO 6kW

NOMINAL 4kW

# 5

AVALON 5  
COMPACT

Our design engineers have crafted this stunning compact stove with all the charming characteristics of our larger styles.

The Avalon 5 Compact has surprisingly neat dimensions - with a depth of only 363mm, it will sit comfortably on your hearth whilst still emitting an impressive heat.

AVALON 5  
SLIMLINE

For rooms with a narrow hearth, the Avalon 5 Slimline is an ideal choice.

This room heater retains the efficiency and output of an ampler model, so you can still enjoy a generous warmth on those cold winter nights. Boasting advanced stove technology for maximised combustion, this is a wonderfully eco-friendly option too.

CONTACT YOUR DEALER FOR INSTALLATION ADVICE

## NOMINAL OUTPUT

Nominal output is a reasonable heat output that should be achievable without over-firing the unit.

Under specific test conditions, the independent test laboratory operates the stove at less-than-optimum conditions to replicate customer use.

## 10 YEAR WARRANTY

Avalon authorised dealers provide an extended 10 year warranty.

For full warranty specifications, terms and a list of authorised stockists, please visit [www.hunterstoves.co.uk](http://www.hunterstoves.co.uk).

DEFRA  
APPROVED

The whole Avalon range is approved by DEFRA, the Department for the Environment, Food & Rural Affairs. This means that each stove is permitted for use in Smoke Control Areas, as particle emission levels are so low.

## OPTIONS

### OPTIONAL FLUE GATHER BOX

For rear flue installations with limited space.

### OPTIONAL FLUE DAMPER

This allows a greater controllability on the flue draw (if necessary).

### WOOD BURNING AND MULTIFUEL

All our Avalon stoves are available as a multifuel model as standard, however there are also wood burning options available.

### HANDLES

All stoves in the Avalon range are available with either stainless-steel or black handles and matching control knobs.

# T

## TECHNOLOGY

Our trademarked Tripleburn® technology is not only better for your stove, it's also better for the environment.

It uses three streams of air to maximise combustion, so that more fuel is burnt and less is turned into deposits in the stove, chimney or atmosphere. Our Avalon stoves are among the most eco-friendly models on the market, with proven low emissions.

### NO NEED TO SCRUB THE GLASS DOOR

Our hot airwash technology does the work for you. A secondary air wash maintains a stream of air between fuel and door, reducing the build-up of carbon deposits on the glass.

### OPTIMUM WOOD BURNING CONDITIONS

Tripleburn® technology improves the ignition of the fuel, with a jet of air directed into the heart of the fire. When the grate is in the closed position, it creates a flat base and allows a deep bed of ash to build up – these are the optimum conditions for burning wood.

### OPTIMUM SMOKELESS FUEL BURNING CONDITIONS

When burning smokeless fuel, the grate is moved to the open position by a single turn of the handle. Primary air is then directed under the open grate and into the heart of the fire, ensuring a clean, efficient burn.

Tertiary air re-ignites the un-burnt gases to ensure a cleaner burn.

### FROM WOOD TO MULTIFUEL WITH A SINGLE MOVEMENT

The integral grate in the Avalon range can be changed from the wood setting to a multifuel setting with the cold-handled riddling tool.

### INTERCHANGEABLE FLUE OUTLETS

All of the single-sided freestanding stoves in the Avalon range can be flued from either the top or the rear.

### COLD-HANDLED RIDDLING TOOL

The cold-handled riddling tool can be used for opening and closing the doors, riddling the grate, grate adjustment and easy removal of the ash pan.

### DUST-FREE, SAFE AND EASY RIDDLING

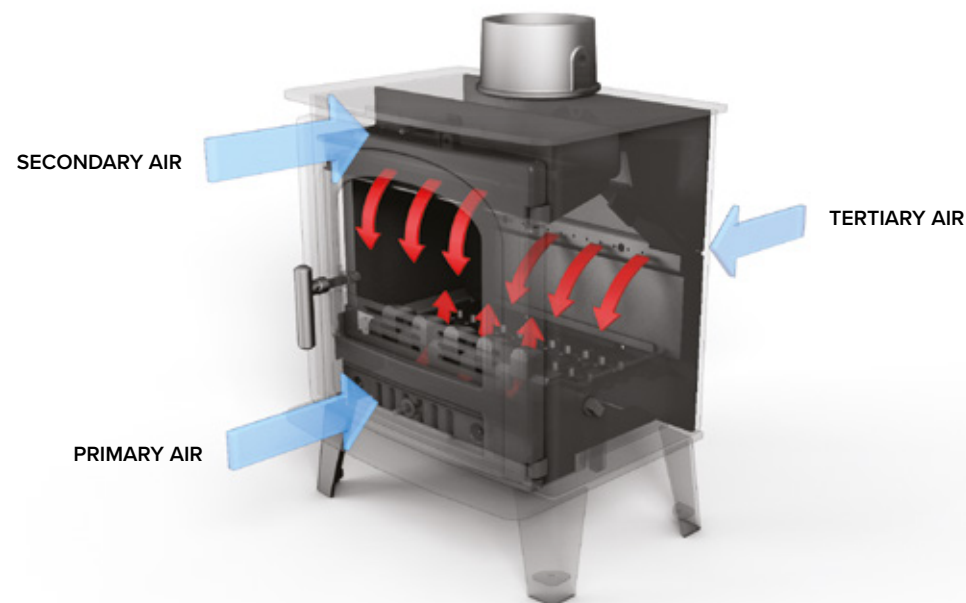

By simply moving the riddling tool backwards and forwards, the stove riddles safely with minimum effort. This is undertaken with the doors closed and is completely dust-free.

### EASY ACCESS FOR CHIMNEY SWEEPING

Each stove features a removable throat plate, giving full and easy access for sweeping the chimney.

### INTERNAL LINING SYSTEM

The internal lining system maximises the firebox temperature, ensuring a more complete combustion.

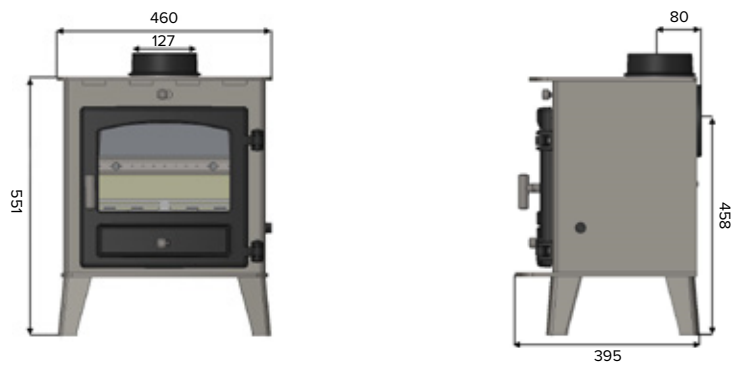

# D

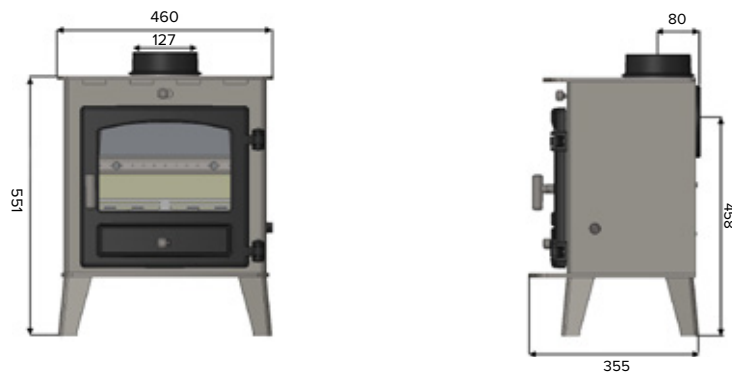

## STOVE DIMENSIONS

For full information on installation criteria, please refer to the instruction manual. This can be found on [www.hunterstoves.co.uk](http://www.hunterstoves.co.uk), or by contacting your dealer. All information in this brochure is correct at the time of print. E&OE. All images are for illustrative purposes only.

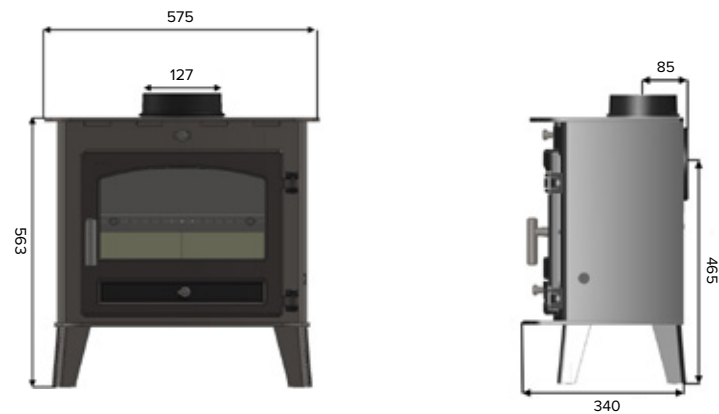

**PLEASE NOTE:**  
All measurements are for the stove's maximum height and width in millimetres (mm). All illustrations are for illustrative purposes only.
